**SUBJECT: MOUNTING PARTS**

PB-109

PAGE: 1 of 1

REV.DATE: 4/23/2007

ISSUED: November 3, 1970

Compressor performance, service life, operating noise level, and resistance to shipping damage are all, to some degree, affected by the quality and design of compressor mounting components.

Tecumseh Compressor Company recommends certain grommets, springs, and sleeves for all hermetic models as shown on Engineering Policy No. [EP-5](#).

In the absence of specific exceptions where Tecumseh customers have obtained approval for alternate mounting parts, the list attached to Policy Bulletin [PB-109](#) will constitute a firm Tecumseh policy recommendation.
