PRODUCT BULLETIN

Dear Valued Customer,

Tecumseh Compressor Company, LLC would like to inform you of a change in labeling on AJ2 compressors. Beginning in July of 2021, you may notice that there will be duplicated labels on the compressors with the same information – one will be located on the side of the compressor's lower housing and another on the upper housing. The side label may be covered on the BOMs with relay box so for easier identification a second label will be included as well. This change is relevant only for Tecumseh's internal processing of compressors and does not change anything in regards to the product you are receiving. The reference photos below show the described action.

If you have questions that are not addressed in this bulletin, please contact your local Tecumseh Sales Representative or Technical Service Team (800.211.3427) members.
