Low-Profile Unit Cooler  
3,000 to 60,000 BTU/h  
Walk-Ins, Coolers and Freezers

# Tecumseh

designed by  **LU-VE**

## The Leader in Unit Cooler Technology

Our industry leading unit cooler is developed in partnership with LU-VE to bring unprecedented airflow, heat exchange and air throw to the walk-in market. Our unit cooler maintains product freshness while lowering energy consumption and frost formation. With the extremely low noise level and energy consumption, our unit coolers are engineered to meet any demand.

### Expert Craftsmanship

- ▶ Three different evaporator sizes
- ▶ Capacity range from 3,000 to 60,000 BTU/h
- ▶ Airflow from 550 to 6100 CFM
- ▶ High airflow performance enabled by patented fan design
- ▶ Pan design eliminates condensation drip

### Superior Coil

- ▶ Industry leading heat exchanger technology
- ▶ State-of-the-art coil and airflow design
- ▶ Six or four fins per inch
- ▶ Heater positioning results in high-efficiency defrost

### High-Efficiency

- ▶ High-efficiency EC motors for 115 volt or 208-240 volt
- ▶ Air defrost models designed for use in coolers 35° and warmer
- ▶ Heater safety thermostat installed to prevent overheating
