SUBJECT: START ASSIST OPTIONS ON COMPRESSORS WITH PSC MOTORS

PB-114

PAGE: 1 of 1

ISSUED: August 1, 1974

REV. DATE: 4/25/2007

Field experience indicates the need for improved or higher starting torque on some occasions where compressors with PSC motors are expected to start at extremely low voltage or circumstances beyond normal start conditions.

Engineering Policy No. [EP-6](#) on PTC Start Assist Device outlines the subject and offers the design information necessary to exercise this option.

This Policy Bulletin carries the authorization to use the described device on any Tecumseh Compressors with PSC motors under the terms of Tecumseh Compressor Company warranty.
